VOLUME XX, No. 18

EMPRESS, ALTA. THURSDAY, Sept. 29th, 1932

Price: \$2.00 Per Year.

## United Church

### COMMUNION SUNDAY

Empress:  
Church School, 2:00 p.m.  
Public Worship, 7:30 p.m.  
The Lord's Supper will be administered at all the services.  
Leland, 2 p.m.  
Social Plains, 3:30 p.m.  
Please remember the changes in the hours of service.

Rev. Geo. A. Shields,  
Minister.

### R.M. Mantario No. 262

Minutes of meeting of Monday Sept. 12, 1932 At Mayfield Hall, 10 a.m. Present, Reeve Walker and a full committee.

Owing to the fact that both the Reeve and the Deputy Reeve were not present when the meeting of the Council had assembled, on motion of Cn. Rowles, Cn. Hawtin was moved to the chair.

Minutes of previous meetings were read and confirmed on motion of Cn. Rowles.  
Treasury's monthly statement ordered accepted and filed on motion of Cn. Montgomery.  
S. S. Smitherson waited on the Council in regard to threshing and combine owners in harvesting crops under seizure and was assured that sufficient grain would be exempted to take care of the cost of harvesting.

Also in regard to the Trossley S.D. assurance was given that if taxes were paid in that district and in proportion to the amount paid and as they were paid, the S.D. could rely on advances for school purposes, but that we were unable to guarantee advances until taxes were being collected in that district.

Dahl—That the Secretary take the necessary action and

## W. R. Brodie's Store

### Is Broken Into

W. R. Brodie's store was broken into and entered on Monday night. Mr. Brodie estimated around \$40 to \$50 of goods and tobacco had been taken, the round drawer of the cash register had also been smashed. Constable Cameron lost no time on the job, with the result that two men concerned in the robbery were apprehended at East Couline and taken to Calgary for trial.

Any such charge as may be proper against W. J. Shouldice and Mrs. Christine Shouldice for removing header after seizure by the collector.

Rowles—That the tax collector, or be authorized to sell the header seized on account of arrears of taxes due by W. J. Shouldice on the N.E. of 255, 29 v.3.

Rowles—That a cheque be issued in favor of Mrs. Christine Shouldice for \$10, replacing cheque No. 47 K of July 3, 1929, drawn to W. J. Shouldice, who signed a statement that he had no claim on the amount.

Rowles—Re J. Stewart, N.E. 35 24 29 v.3. That on payment of \$50 in respect of arrears of taxes due, the taxes levied on this land from date at entry to October 3, 1925, be cancelled on account of the delay by the Department of the Interior in adjusting the amount of improvements.

Walker—That offer of settlement 1932 taxes by C.N.R. on lands reverted to the Crown made by the Court of Revision and now accepted by them be and is hereby confirmed; the proportion to the date of transfer—May 17th—to be charged.  
Accounts passed by Finance committee.

P. P. & S. Commercial Printers, 255; Mantario phone, 100.

## Alberta Reduces Price of Coal

Edmonton, Alta., Sept. 28.—In an effort to capture the Manitoba, Alberta coal operators have announced a reduction in prices to the consumer ranging from 50 cents to \$1 per ton, this reduction being made possible by enforcing economy in the mining and distribution of the coal. For the first time in 30 years the American coal has been effectively shut out of the Manitoba market, and coke is now the only real competitor left for the United States.

In spite of the fact that the railroads have given no concessions on freight rates to Alberta coal dealers, they were able to dispose of 200,000 tons of Alberta coal to Manitoba last winter and by a further reduction in price they hope to establish a still greater interprovincial trade this winter.

### See This Thriller!

The picture shown on Saturday is entitled, "Hotel Continental" a detective mystery drama; an all-talking thriller. To round out a good program a good comedy is being shown. You will want to see this program. Commences at 8:15 p.m.

### Change In Train Times

The times of train service to the West has been altered to—arrives at Empress on Mondays and Thursdays at 6:45 p.m., leaves on Tuesdays and Fridays at 9 a.m. There is no alteration in times of service to the East. The Empress train now makes connections with the main line train at Swift Current instead of running through to Moose Jaw.

Empress Express, 12:00; West. Man. Nowe, 5:75 and 7:50; Star advt., 2:40; Seat, Trees, district warrants, 15:50; Do. Prelim. Survey, 11:40; Do. postage, 22:51; Stempel and Patrick, audit, 30:40 Hospitals, Empress, 37:50.

## TIRES FOR THRIFTY PEOPLE

GOOD YEAR  
TIRES

The kind that are preferred by 49 out of 100. The kind—the only kind—that are made with Super-Twist Cords. Mileage that is long. Satisfaction that is great. Safety that is reassuring. Price—as low as any tire will ever consider using. Come and see them.

Storey's  
GARAGE

## Gasoline Tax To Be Fought In Court

The Supreme Court of Alberta will be asked to decide the province's right to collect five cents on every gallon of gasoline sold in Alberta. The case will come up before the court probably at the end of this month.

J. J. Frawley, acting on behalf of the attorney-general's department, has started action against the Globe Oil Co., of Calgary, and M. A. Lavoie, of Turner Valley. Mr. Frawley claims they have failed to abide by the rulings of the Gasoline Tax Act of 1929.

Mr. Lavoie and the Globe Company declare the act is ultra vires. They maintain it is "unconstitutional legislation designed for the purpose of enabling the crown to impose indirect taxation."

The attorney-general's department charges the Globe Company with failing to collect \$144,000 under the tax act for gasoline it sold.

Mr. Lavoie, it is alleged, has failed to pay \$5,165.00, due under the act for gasoline he distributed.

Both defendants maintain they entered into no agreement to collect the tax when selling the gasoline as charged by the government.

### West May Get Rainy Cycle

Predicting that within another five or ten years a period of great annual precipitation or lower average temperatures might be felt in Western Canada, H. W. Allen, prominent member of the Alpine Club of Canada, addressed fellow Klondikers at their meeting in Calgary.

"Movements of the glaciers in the Canadian Rockies and the Selkirk range" was the subject on which Mr. Allen spoke. Measurements in older countries had shown that glaciers advanced for a period from 35 to 50 years and then retreated during a similar period.

Records in Canadian mountains dated back only 45 years, during which time most of the glaciers had been retreating at varying rates, Mr. Allen said. "So it may be that in another five or ten years, these glaciers will commence a cycle of years when they will advance," the speaker declared.

"The cause of this will be greater or lower annual precipitation or both," Mr. Allen explained.

## Pool Notes

Alberta Wheat Pool sold two cargoes of wheat to China on September 16th.

An official report from Australia states that the condition of the wheat crop there is generally good. Australia increased wheat acreage materially this year, seeding some 18,000,000 acres.

Alberta wheat growers desiring to place their wheat in the 1932-33 pool must designate their intention upon delivery of the wheat.

Stacks of wheat at Liverpool amount to only 1,294,000 bushels compared with 5,166,000 bushels at this time a year ago.

Rain and snow was fairly general in Alberta over the past week end and heavy rain fell in Northern Saskatchewan. Threshing was delayed as a consequence.

Spain's new wheat crop is estimated at 138,800,000 bushels as compared with 191,300,000 bushels last year.

The Alberta Pool elevator at East Couline has been moved to Tilley, and is now open for business. This is a 40,000 bushel house.

Russian sowings of winter wheat were 16,300,000 acres on September 1, as compared with 24,908,000 acres on the same date the previous year.

In China, the wheat crop is smaller than last year in those areas involved in the foreign trade in wheat and flour.

Alberta Wheat Pool reports a larger volume of wheat being delivered on Pool basis this season and date than compared with volume pooled the same date a year ago.

## St. Mary's Virgin (Anglican Church)

18th Sunday after Trinity, 2nd Oct., 10 a.m., Sunday School.

October 9th—20th Sunday after Trinity.

10 a.m., Sunday School.

11 a.m., Matins and sermon.

3 p.m., Gavendish School house, Harvest Thanksgiving Service.

Rev. J. P. Horne.

Newspapers and mail matter coming from east of Moose Jaw was delayed on Saturday owing to a freight wreck on the main line. The freight was cars of wheat, coal and gasoline. It is surmised a broken wheel caused a car of gasoline to ignite, a number of cars and their contents were destroyed.

Mrs. E. Butchard, of Sibbald, passed away at Alaskan on Thursday last as a result of burns and shock to the system suffered the previous day when pouring coal oil on the stove. The deceased was a sister of Bert Harnett, who with Mr. Butchard, was in the pool hall business here in the early days of our town.

It is not always the small lightning plant that fails at a crucial time, as evidenced at Bassano last Saturday week when the town was in darkness during the busy evening hour.

## ALBERTA GOVERNMENT SAVINGS CERTIFICATES.

Secured by the entire Resources of the Province

5  
0  
4  
0

Certificates payable, one, two and three years from date of issue. Interest payable at 5 p.a. per annum. Issued in denominations of \$25.00, \$50.00, \$100.00 and larger amounts.

Certificates payable on demand, bearing interest at 4 p.a. per annum. Issued for deposits of \$5.00, \$10.00, \$25.00, \$50.00 and upwards.

### SAVINGS CERTIFICATE BRANCH

TREASURY DEPT.  
Edmonton, Alta.

HON. R. G. REID.  
Provincial Treasurer.

## "RADIO BATTERIES"

### Initiative Wins.

When Marshal Foch was given command of the French army during the World War, one of the first things he is reported to have said was: "To be—! with history and principles! What is the problem?" Though Foch was perhaps the world's greatest student of military strategy, he was no slave to it. He tackled each problem with initiative and vim. This method won for Foch.

The Review of Reviews magazine declares that a study of recent reports will show that those industrial organizations that exerted wide and sustained vim and initiative produced more than those which stood pat watchfully waiting, or those which imitated others. It points out that the larger the business, the more it tends to become standardized. System and routine often kill initiative and stifle progress. This explains in part why a small organization will so often place a new, out-of-the-ordinary product upon the market, something for which a real need has long existed but which no one previously appeared to have recognized.

Safety glass, now used so widely for windshields and bank cases, is the result of alertness and initiative. Non-shattering glass was discovered accidentally by a French chemist who knocked over a test-tube that had been used for months. Stopping to pick up the pieces, he discovered that the paste substance in the tube held the broken glass intact. Mentally alert, the chemist remembered that the tube contained a mixture of trinitro-cellulose, ether and acetone. Experiments followed and safety glass was the result.

Rear Admiral David Watson Taylor is credited for having been able to reduce the coal bill of the United States Navy by one-half, utilizing the bow wave for ship propulsion. A biscuit company-making money only erratically saw its sales rise enormously by fashioning cookies in the shape of dogs, animals, and similar enticing forms. A manufacturer of towels was able to build up sales enormously by introducing towels in colors to harmonize with the bathroom tiles. Children's towels were created. Complete ensembles were worked out—towels, washcloths, bathmats. That plant is reported to have maintained full capacity throughout the depression.

Foods have undergone marked development because of research followed by initiative. It was discovered that tomato juice is rich in vitamins A, B, and C, and in three years, tomato juice has caught the public's fancy. Progressive manufacturers of canned tomato juice were alert to their opportunity. In two years the sales of canned tomato juice have a gain of 62 per cent, and bottled 177 per cent.

Today there is no paucity of opportunities. But there is paucity of vision, initiative, and courage to capitalize them. As Charles Kettinger, vice-president in charge of research, General Motors Corporation, says, "Business will come back when we get products that people want to buy. If one-tenth of the energy was spent in getting such products instead of stirring up the mud, we would get along better."

The task of leaders is to lead. There is not an industry or a line of manufacture but affords unprecipitated opportunity for initiative. Today, as during the days of the World War, executives might think to advantage as Marshal Foch was thinking when he said, "To hell with history and principles! What is the problem?"

### Britain Is Providing Underground Airports

Planes Will Use Inclines To Come To Surface

Underground airports are to be provided for the British Air Force. This decision was made after it was found that no camouflage could hide the hangars from the powerful lines now being used in military cameras. The new airbases will be at a minimum depth of thirty feet. There will be inclines for planes to come to the surface and take off.

It is good to have money and the things money can buy; but it is good, too, to check up once in a while, and ask sure you haven't lost the things money can't buy.

Try Lida's & Pishan's Vegetable Compound

Felt Terribly Nervous  
Fagged out... I should take Lida's & Pishan's Vegetable Compound. Try it. It can build up the system. Its use...

W. N. U. 1368

### Grow Seedless Grapefruit

Secret Was Originally Discovered By South African Planman

South African planters have mastered the secret of growing seedless grapefruit, and bulk supplies are now beginning to be exported. A careless planter discovered the secret originally. His blunder came in contact with a grapefruit root and a small tree, growing from the incision, produced seedless (seedless) grapefruit. South African growers experimented and found that similar fruit could be produced only under special conditions.

Persian Halm preserves and enhances woman's natural heritage of beauty. For sheer femininity it is unrivaled. Tones and rejuvenates the skin, and makes it exquisite in texture. Delightful in use. Smooth and velvety. It imparts a youthful charm to every complexion. Indispensable to all dainty women. Especially helpful to every complexion. Indispensable to all dainty women. Especially helpful to every complexion.

A new camphor factory in Japan is to make intensive studies of the economic and scientific side of the camphor industry.

Muskatins introduced into Great Britain in recent years for fur breeding, are now producing a menace, due to their burrowing habits.

### Men's Greatest Invention

Hammer Is More Necessary Than Any Tool Made

If you ask half a dozen people what they consider to be the greatest invention ever made, the majority will suggest such things as the steam engine, the dynamo, or the electric telegraph. But these are only the results of a much earlier and far more important discovery. The earliest and greatest invention ever made by man was the hammer.

You cannot undertake any piece of constructional work without a hammer. Though you may not actually use it, it must have been employed in making the tools with which you do the work. The hammer was the first tool which enabled man to multiply his strength; to do something which was impossible with his bare hands.

It was probably invented by a remote ancestor who had the inspiration to use a stone for cracking the shell of an oyster or whelk. The earliest hammers had no handle. They were merely conveniently shaped stones held in the palm of the hand.

Fasten such a stone to a handle and you have a much more effective tool. Sharpen its business end to an edge by chipping off flakes, and it becomes a stone axe. The formation of an edge on the earliest flint tools could be done only by means of a hammer. The hammer thus gave birth to both the axe and the adze, the earliest of cutting tools.

From the adze and the chisel to the saw is but a step. The drill is simply a small chisel. It was first fixed to a round shaft and rotated by the palms of the hands; later, primitive man invented the bow and arrow method of turning it. The bow and drill is still in use in certain trails.

### Medical Science Finds

Chinese Doctors Right Experiments Prove "Pin-Pick" Cure Has Its Merits

The Chinese doctors have one method of curing their patients which has always bewildered and amused the western world. If a man is ill, they stick a pin into him. It is not a pin, at any rate, a needle or a copper wire tied to a point. They do just that, and nothing more. No drugs are used.

In a good many ailments this cure has nearly always been successful, and westerners put it down to faith curing—the powers of suggestion. Now, after many centuries, medical science has decided there is something in it, and the Chinese experts are asked to demonstrate their methods.

Picking a patient with a needle in the right spot has a certain effect on nerve centers. Experiments have shown that it can cause a cessation of violent neuralgia, or sciatica; it has given temporary relief from asthma and has been helpful in cases of indigestion, of gastric or intestinal disorders, giving instant relief.

Research into acupuncture—"pin-picking"—has just started, but it is quite likely that in a few years it will be largely used instead of pain-soothing drugs.

### Stock Exchange Seats Up

Estimated Value Shows Big Increase

In Short Time  
With the recent sale of a seat on the New York Stock Exchange for \$120,000 the value of the 1,375 seats went up by 35 per cent. The estimated value of the seats is now placed at \$185,000, an increase of \$41,250,000 over the total of a week before.

The traders in Wall Street are preparing to pick up where they left off a few years ago. It is getting on three years since the crash on October 29, 1929, when 18,400,000 shares changed hands.

Hostile reactions have been hearding their money for a long time. They are beginning to feel the itch to spend. The stock exchange is one of the barometers, even if it is a place where many lose their savings. And the exchange is giving itself for a pick up in its business.—Brooks Cities Star.

### Higher Education Popular

There were 57,294 students in the twenty-three universities in Canada during 1931, and 25,137 attended the 101 colleges in the Dominion. Of the rest total of individual students at both universities and colleges there were 46,354 males and 23,798 females who followed the higher education. The ladies secured 35.7 per cent of the diplomas, licenses and degrees granted.

Visitors say American schoolgirls are too fond of gum. Part of their chieftain, no doubt.

# Keep that drain clear...

FREE BOOKLET! The Gillett's Lye Book tells many ways to make all your cleaning easier. Give us your name and address for making for tree spraying, disinfecting, and other uses. Write to: Gillett's Lye, 1000 Broad Street, Toronto, Ontario.

## GILLETT'S LYE

Never dissolves lye in hot water. The action of the lye itself heats the water.

### EATS DIRT

### Motion Without Motive

Chinese Description Of Western Civilization Fits Speed Maniac

Judging by the number of convictions in recent weeks, the Ontario authorities are in earnest in their determination to make the highways of that Province safe for the average motorist.

There is rarely any intelligent reason for driving a car beyond a reasonable speed. Occasionally, in an emergency, fast driving may be justified. For the most part it is merely craziness.

One of the most frequent causes of fast driving is the desire merely to pass some one to the way to nowhere in particular. Which gives point to the Chinese observer's description of Western civilization as "motion without motive." The speed maniac might just as well be driving around an enclosed motor speedway as on the public highways. Perhaps something of the kind may eventually be provided for those infected with the speed virus.—Winnipeg Tribune.

### Buys His Home Village

After an absence of more than 40 years, William McGregor, who left his home in Lathernwheel, Cathness, Scotland, to seek his fortune in Australia, has returned to become the owner of his native village. As a boy he was employed in herding cows. Director of several Australian companies, he came back to visit his sister, Miss Jeanie McGregor, who still lives in the cottage where they were born. He bought the village when it was placed on the market recently. It has now 120 inhabitants.

### Drives Asthma Before It

The smoke or vapor from Dr. J. D. Kellogg's Asthma Remedy gives asthma no chance to linger. It eradicates the cause. Our experience with the relief-giving remedy shows how actual and positive is the success it gives. It is the result of long study and experiment and was not submitted to the public until its makers knew it would do its work well.

### His Voice

Newsed was showing an office friend over the young couple's new house. "All this luxurious furniture is just what you know," he explained. The friend nodded approvingly. "Very nice, I'm sure," he replied; "but surely you had a voice in the matter."

"Yes, the invoice," said the young husband.

Erosion taken 21 times as much plant food from the field and pastures of America as is removed by harvested crops.

### Bad Constipation And Sick Headaches Ended By Vegetable Pills

Formerly a wreck from Constipation, I have been cured by taking Carter's Little Liver Pills. Results have been marvelous. I declare they are PURELY VEGETABLE, a gentle, effective tonic to both liver and bowels. Dr. Carter's Little Liver Pills are without equal for constipation, biliousness, indigestion, poor complexion and indigestion. 25c & 75c. Red package. Ask for Carter's by NAME.

### Mine Taken Over By Workers

Interesting Experiment Is Under Way In Nova Scotia

For a quarter of a century the people of Inverness, N.S., have been working for somebody else. Now they will be in business for themselves, directing and operating the coal mine that is the only industry in the town and marketing its products.

Their co-operative plan, approved recently by the government of Nova Scotia, is expected to banish the threat, long dreaded by the town's 3,000 inhabitants, that the mine would be closed.

Under the agreement with the government, operation and control of the mine has been transferred to a new company, the Inverness Coal Co-operative Company, Limited, members of which are to be miners employed in that mine and taxpayers of Inverness.

### Canadian Radio Programme Broadcast From 'Plane

Contact Made With Station From Height Of 3,000 Feet

An advertising stunt that proved as serious scientific importance as it did a public relations success was accomplished here recently when Arthur Dupont, local radio announcer, and Sydney M. Nesbitt, aeroplane club official, successfully established contact with a Montreal radio station while flying 3,000 feet over the city. Both men gave short addresses which were clearly received by many wireless fans.

It was believed to be the first Canadian radio program broadcast from an aeroplane, though short addresses were broadcast from the airship R-100 over Ottawa in 1920.

Worms in children work havoc. These pests attack the tender lining of the intestines and, if left to pursue their ravages undisturbed, will ultimately perforate the wall. These worms are of the hook variety that cling to and feed upon the intestinal surfaces. Miller's Worm Powder will not only exterminate these worms, of whatever variety, but will also repair the injury they have done.

### New Paint Sells Uncanny

How hot a kettle is at any moment can be told by the color of a paint which has just been invented. A kettle painted with the new material, which is a mixture of salts of mercury and copper, looks bright red when cold, but as it warms up above 140 degrees it becomes maroon colored. At 200 degrees higher it takes on a dull chocolate hue, and at boiling point it is quite black. Cooling brings its color back.

Mother Grooms' Warm External—will drive worms from the system without injury to the child, because its action is wholly curative is mild.

"Too bad that Tom and the girl he's engaged to. Neither one of them is good enough for the other."

"Where did you get that idea?"

"I've been talking the matter over with both families."

About one-half the world's lepers are in China.

Rice accounts for about 80 per cent of Siam's exports.

### Feeder Purchase Policy

Designed To Encourage Winter Feeding Of Cattle and Lambs

Renewal of the Feeder Purchase Policy designed to encourage the winter feeding of cattle and lambs of suitable type and quality is announced by the Hon. Robert Weir, Federal Minister of Agriculture, in the terms of this policy, broadly put, the Federal Government will pay the reasonable travelling expenses of a farmer or his agent to the stockyard point of purchase, the feeder sales, or nearest station to range point at which feeder stock is purchased. To secure the benefits of the policy at least one car of stock (20 head of cattle or 40 lambs, or a combined car, figured as 2 lambs as the equivalent of one beef animal) must be purchased. Stock purchased is subject to approval as to type and suitability by the official representative of the Dominion Live Stock Branch serving the point of purchase. Special provision has been made to extend the benefits of the policy respectively to farmers of Eastern Canada, of the Prairie Provinces, and of British Columbia.

Complete details and information about the policy and the benefits can be secured by writing the nearest stockyard agent of the Dominion Live Stock Branch, or direct to: R. H. Fraser, Chief, Cattle Division, Dominion Live Stock Branch, Ottawa.

The policy is operative a period of five months from and after August 1, 1932.

### Ontario Relief Organization

Public Welfare Board For Each Municipality To Handle Direct Relief

Organization of a public welfare board for each municipality to administer direct relief is recommended in the report of the advisory committee on direct relief to the Ontario Government, and announced by Hon. Dr. J. D. Monteth, Minister of Public Works and Labor. Where possible, it is also suggested that an association or league of organizations interested in public welfare should be organized to assist the board in its capacity and arrange for the conduct of campaigns in connection with the raising of funds, etc.

Housekeeping accounts on an Ohio farm indicate that a farm family of five people spends about the same money for food that a bachelor spends in the city.

Eggs are better than a spring tonic. In view of the iron, vitamins and protein they contain, is the advice of the bureau of economics.

## Irish Free State Farmers Seek End Of Tariff War With Britain

Dublin, Ireland.—Hatepayers and farmers of the counties of Dublin, Meath and Kildare, meeting in the Mansion House, adopted a resolution calling upon the Dail Eireann to end immediately economic war against the United Kingdom.

The resolution included a request that every county in the Irish Free State should hold meetings to prepare for a convention to be held in Dublin, September 15, with a view to the adoption of effective measures. The motion added that the 20 per cent tariff on all livestock and farm produce imposed by the United Kingdom following the failure of the Irish Free State to pay land annuities must lead to ruin for the whole farming community of the Free State.

"It is useless for De Valera to talk about a scheme for growing more wheat," declared Captain Daly of County Dublin. "The Free State Minister of Agriculture (Dr. James Ryan), never tillled a piece of land in his life. Is a farmer to put cattle out on the land and let them die?" Four hundred Meath farmers met at Navan and called on all farmers' organizations to co-operate in a campaign for safeguarding Free State agriculture.

### Plan Has Collapsed

Iowa Farmers Allow Produce to Enter Des Moines  
Des Moines, Iowa.—Farm produce was brought unhindered into Des Moines with the collapse of the last strong farmers' holdout from the market. Sheriff Charles P. Keeling, a force of deputies, and truck drivers, all armed with clubs, massed on highway 65, north of the city, and forced their way through members of the Farmers' Holiday Association, who seek to force higher agricultural prices by keeping produce from the markets. The "big push" against the blockade, after starting at a point five miles from Ames, resulted in the free movement of produce into this capital city.

### Prefers Northern Port

Steamship Captain Says Churchill Easier Port To Reach Than Montreal  
Churchill, Man.—"I have hundreds of friends and associates in Montreal but in fairness I must tell you that I much prefer to sail into Churchill than into Montreal. You can sail in here without fear or worry and that's more than you can say for Montreal. We had a wonderful passage. We are glad to get the business." This was the statement of Capt. G. Blacklock, commander of the S.S. Silkworth, Newcastle, who arrived here to head off for the United Kingdom.

Keep Cotton Off Markets  
Washington.—A \$50,000,000 fund was available to keep government-controlled cotton off the market until 1933. For six or seven months, at least, all sale would be halted under a plan devised by the farm board and financed by the reconstruction corporation.

Next Conference At Banff  
Banff, Alberta.—With delegates from nine countries and observers from various national and international governing authorities, the Institute of Pacific Relations will hold its triennial conference at the Banff Springs hotel during August, 1933.

## Chancellor Von Papen Is Calmly Awaiting The Turn Of Events

Berlin, Germany.—Chancellor Von Papen will refrain from dissolving the new reichstag only if his cabinet is empowered by a special emergency law to govern for six months without parliamentary support, the Associated Press has learned. Officials of the new reichstag, which held its first session Tuesday, August 30, have attempted to obtain an immediate audience with President von Hindenburg, but have been trying to convince him the legislature is able to carry on parliamentary government.

### Earl Of Egmont Weds

Marriage To Daughter Of Prominent Calgary Resident Is Announced  
Calgary, Alberta.—The Earl of Egmont, who left Calgary bound on a honeymoon trip to Vancouver. The 19-year-old Priddy rancher was married to Ann Margaret Moodie, eldest daughter of Mr. and Mrs. D. G. Moodie, prominent Calgary residents.

The wedding was held quietly at St. Mary's Cathedral and was a surprise to friends of both the bride and groom. The youthful earl had been acquainted with his bride only a short while, meeting her shortly after his arrival from England two months ago.

Following the wedding the young couple departed for Vancouver. They will visit a number of points en route, including Jasper Park in the Rockies. Their plans after the honeymoon have not been announced but it is believed they will take a trip to the old country.

Only close relatives attended the ceremony, the bride being given away by her uncle, C. A. Dowling, of Calgary.

Early in June the young Earl returned to Calgary following the death in an auto accident of his father after which he succeeded to the title. He was immediately to his little manor at Priddy, near Calgary, where he was born and to the little home his father left to take up residence in England when he obtained the title. Declaring himself tired of the "lonely life of an earl," the young man joined in ranch life, taking up where he left off when he departed for England.

Following the Calgary stampede in July when he officiated in the prize awards, the earl spent some time in Calgary. It was during his stay that he became acquainted with Miss Moodie and it was only a short while until the acquaintance blossomed into romance that finally resulted in the recent event.

Very little information could be obtained from the bride's father or mother regarding the wedding, and the earl refused to meet newspapermen.

### Free State Imposes Duties

Duties On Sheep and Poultry Aimed To Help Home Industry

Dublin, Ireland.—Duties on sheep and poultry imported into the Irish Free State were announced by the government as a further encouragement to home industry.

A duty of 11 shillings and three pence (\$2.70) per head will be imposed on all sheep and three shillings (72 cents) on poultry imported by the terms of the order which was issued under the Emergency Duties Act. Two-thirds of the full rate is applicable as a preferential rate to the British Empire and the United Kingdom.

The duties are not directed against the United Kingdom as the imports of sheep and poultry from there are negligible. The main trade is carried out between the Free State and northern Ireland.

### Employees Get Bonus

Chicago.—The brokerage firm of Krugger and Brand announced that employees would be paid a 10 per cent bonus for the month of August. The staff earned it, officials announced, because business was so good they had to work overtime.

## Chancellor Von Papen Is Calmly Awaiting The Turn Of Events

One of the chancellor's closest collaborators was authority for the statement that von Papen intends to proceed as though Adolf Hitler no longer were a political factor. In this stand the head of the cabinet is backed by the president.

Armed with a signed but undated decree dissolving the reichstag, which he obtained from the president, the chancellor calmly awaited the next move of parliament, biding his time for the most effective moment at which to end the session.

### Conference Starts Work

Agricultural Experts Get Down To Business At Toronto

Toronto, Ont.—Dividing into committees for intensive work, Canada's first conference of agricultural experts, federal, provincial and academic, summoned by Hon. Robert Weir, Minister of Agriculture, grappled with the farmer's greatest problem—how to make farming pay when prices are low.

A national advisory council to continue the work of co-ordination, was advocated by Mr. Weir at the opening session, and possibly provincial councils to deal with problems of purely provincial importance. Agricultural organizations, he contended, should join forces rather than work separately on the same problems.

S. E. Todd, secretary of the Industrial Council of the Canadian Meat Packers' Association, announced that henceforth packing houses will permit government inspectors to inspect hog carcasses "on the rail" in the abattoirs. This concession is expected to help Canada in the United Kingdom market against competition from Denmark, where bacon producers have for some time enjoyed the advantage of government inspection in the killing plant.

### To Attend League Meeting

De Valera Announces Intention To Represent Free State At

Gathering  
Dublin, Ireland.—President Eamon de Valera has decided to attend the forthcoming meeting of the council of the League of Nations, it is understood in official circles here. He will probably be elected chairman of the council this year.

It is rumored Dublin will again be visited by Rt. Hon. J. H. Thomas, secretary of state for the dominions in the United Kingdom government. He is expected to take the lead in further negotiations for removing the differences between the Free State and the United Kingdom which arose from the land annuities dispute.

### Canadian Author Drowned

Raymond Knister Widely Known As Successful Writer

Windsor, Ont.—Raymond Knister, 32, of Toronto, was drowned near Stony Point in Lake St. Clair. Knister was swimming and it is believed suffered a heart attack. He was a son of the late Robert Knister and widely known as a writer.

He wrote two novels, "White Narcissus" and "My Star Triumphant," a novella list of Shelley which won the \$2,500 prize offered by an Ottawa publishing firm in 1931.

### Flyer Sets New Record

Floyd Bennett Field, N.Y.—A new speed record for United States transcontinental flying was set when Capt. James G. Hailsham, winning the cross country derby to Cleveland, flashed on to New York in an elapsed time of 10 hours, 19 minutes from Los Angeles. Right on his tail was Captain Roscoe Turner.

### A SHIP THAT WILL NEVER RETURN

Dedication of the "Southern Cross" by the Archbishop of Canterbury at Greenwich, London, England, was a very colorful ceremony. The "Southern Cross" is a Church of England vessel, built at a cost of \$100,000 as the headquarters of the Bishop of Melanesia. She will sail from London for the Melanesian Islands in the Southern Pacific Ocean never to return. It is to work among the sick and suffering in the islands. Above is a general view of the ceremony in the stern of the boat.

### SUCCEEDS KREUGER

Ejorn Prytz, Stockholm industrialist, who has been selected by creditor concerns to be president of the International Reconstruction of the Swedish Match Company, of which the late Ivar Kreuger was head. He will attempt to settle up the affairs of the concern, which was the largest of its kind in the world before Kreuger's suicide bared its straits.

### Review Of Empire

Naval Defence Urged

Australian Minister Of Opinion Time Is Now Opportune

New York.—A dispatch to the New York Times from Melbourne, Australia, says "Sir George Pearce, Commonwealth Minister of Defence, commenting on the suggestion that former Premier Stanley Bruce, while in London, England, would discuss naval defence with the British authorities, said the time was opportune for a review of empire naval defence."

He declared the Ottawa conference had laid down a basis for empire trade which must be carried by sea-borne traffic, therefore the question of empire naval defence called for a new orientation.

The present defences, Sir George said, could not by any stretch of the imagination be said to be satisfactory for such a widely scattered empire.

### Making Final Payment

Britain Wipes Out Foreign Credit Debt Of 1931

London, England.—With the repayment of 2,500,000,000 francs to France on September 10, the United Kingdom has repaid in full the entire amount of foreign credits obtained by the treasury in the financial crisis of September, 1931.

The credits totalled \$200,000,000 from the United States, and 5,000,000,000 francs from France, of which half was advanced by banks and the remainder subscribed by the French public in the form of bonds.

The whole of the United States credit was repaid by the treasury in March and April, with the right to re-borrow \$50,000,000 at any time up to August 28. This right, not having been exercised will now finally lapse.

## Move By Germany For Modification Of The Versailles Treaty

### Marathon Winner

Geo. Blagden, Of Memphis, Wins \$7,500 Prize

Toronto, Ont.—Triumph over the cold waters of Lake Ontario and 169 of the world's best swimmers, George Samuel Blagden, young Memphis, Tenn., half student, swam his way into fame and a fair-sized fortune by winning the Canadian National Exhibition's 15-mile marathon here.

In a day of thrills, a day in which a crowd estimated at more than 102,000 alternately cheered and groaned, Blagden took the lead before the swim was half over, fought off all challenges and set a new world's record for the distance of seven hours, 19 minutes, 52 3/4 seconds. He collected \$7,500 in cash for his day's work. Here is the order of finish:

George Blagden, Memphis, Tenn., 7 hours, 19 minutes, 52 3/4 seconds, \$7,500.

Glenna Gambell, Ely, 7 hours, 24 minutes, 22 seconds, \$2,000.

Jedrore Sponder, Port Colborne, Ont., 7 hours, 30 minutes, 5 1/2 seconds, \$700.

Marvin Nelson, Port Dodge, Ia., 7 hours, 38 minutes, 27 1/2 seconds, \$500.

Bill Goll, New York, 7 hours, 41 minutes, 23 1/2 seconds, \$200.

Harry Glancy, Cincinnati, 8 hours, 11 minutes, 19 seconds, \$100.

### House Opening Date Not Yet Decided

Empire Parliaments Plan To Assemble At Same Time

Calgary, Alberta.—Parliaments of the British Empire are planning to assemble at similar dates and until some definite time has been arranged, Prime Minister R. B. Bennett will not be able to announce the opening date of the Canadian assembly.

In a statement to the Canadian Press Mr. Bennett denied reports from Montreal that the Ottawa body would meet October 6. He is in communication with other countries, he said, and expected to be able to announce shortly when the Canadian parliament would meet.

Canada has not yet been notified of the official date of the opening of the British House, nor of the date of convening of parliament in some other dominions.

### Germany Wants Right To Fortify Frontiers

Also Ask Abrogation Of Treaty Clause Limiting Army Strength

Paris, France.—Germany has officially informed the French Government of her desire of military equality with France. The notice was given through the French embassy at Berlin.

Germany asked the right to fortify the French and Polish frontiers and abrogate the provisions of the Versailles treaty limiting the German army strength to 100,000 men.

The Germans stressed that they considered the military provisions of the Versailles treaty abrogated by the Allies' failure to reduce their own armies.

Paris, France.—Germany's attempt to free herself from the limitations placed on her armaments by the Versailles treaty was discussed in great detail at a meeting of the cabinet, but at the conclusion of the session not a word was forthcoming concerning the stand France will take.

Although every member of the government was uncommunicative concerning the representations that have been made by Germany to France, it was understood the principal points in the German communication were these:

1. Modification of the Versailles treaty and its provision for a 12-year service basis in the German army.
2. Amalgamation of compulsory military service and the period served by the militia.
3. Sanction for a German army of 300,000 men. The present army numbers about 100,000.
4. Permission for Germany to maintain heavy, light and coastal armaments.
5. Permission for maintaining tanks for the German army.
6. Establishment of a complete military aviation corps.
7. Establishment of a school for military pilots.
8. Extension of the German navy by the addition of aeroplane carriers, cruisers and submarines.
9. Sanction for the construction of fortifications and fortifications.
10. Permission to build 35 war material factories.

It was learned authoritatively Premier Edouard Herriot refrained from discussing the German action because he wanted to observe correct usage. Secrecy was requested in the communication received from the Berlin government. This communication was in the form of an aide-memoire, which is a representation less formal than an official note.

A communique issued at the close of the cabinet session said only that the premier had informed his colleagues of the external situation.

The newspaper Le Temps said it understood the German Government was forwarding to Washington and Rome communications similar to the one sent to France.

Official circles expected the French Government to communicate without delay with the interested powers concerning the German move.

Le Temps asserted that Germany's "move to re-arm" had deliberately destroyed the movement which was taking place for the reduction of armaments.

### Abandons Return Flight

Captain Mollison Gives Up Plan To Return By Plane

Sydney, N.S.—Content with the honor of being the first man to make a solo flight westward across the north Atlantic, Captain James A. Mollison has abandoned his plans for a return journey by plane to England.

The adventurous Scot accepted advice of Dr. Freeman O'Neil, his host here, to take things easy for a while. His wife, formerly Amy Johnson, and the backer of his westward flight, Lord Wakefield, asked him not to attempt the return trip, and the captain gave in reluctantly.

## Forge A New Economic Bond Which Will Bind British Empire

Calgary, Alberta.—A new economic bond which will bind the nations of the British Empire in more permanent unity than the antiquated legal bonds swept aside by the Statute of Westminster, was forged at the Imperial Economic Conference. This was the impression of the conference obtained by Viscount Hailsham, Minister for War in the United Kingdom Government, who addressed the annual meeting of the Canadian Bar Association here. As one of the most distinguished British lawyers and jurists, Viscount Hailsham came here to convey the greetings of the legal profession of the United Kingdom to the lawyers of Canada. He has been twice attorney-general, and once lord chancellor of England.

manent benefits for both the Empire and the world would come from the agreements reached at the conference. Lord Hailsham said and credit for them must go to the Prime Minister of Canada, Rt. Hon. R. B. Bennett. It was due to Mr. Bennett's "courage, vision and inspiration" that the meeting at Ottawa was made possible and the disintegration of the British Empire did not begin in 1930.

A resolution of thanks was moved to Lord Hailsham by Hon. W. J. Major, attorney-general of Manitoba. Hon. N. Y. Young had been president of the Bar Association, president.

In recognition of his long activity in the association, Premier R. B. Bennett named him to the position of honorary life-president.

W. N. U. 1935

# First Results Obtained In Scientific Attack On Weeds In The Prairie Provinces

Weeds stand pre-eminent among the causes of agricultural losses in Canada and oddly enough they have been the last of the pests of agriculture to occupy the serious attention of scientific investigators, states a report entitled, "Weed Survey of the Prairie Provinces," issued as the first publication of the National Research Council's Associate Committee on Weed Control.

In a popular account, entitled, "Weeds and Their Control," prepared under the auspices of the Committee for general distribution and issued simultaneously, it is declared that the worst weeds are widely adaptable as to soil and climate and even recently settled areas such as the Peace River district are being gradually invaded and will eventually be over-run unless more effective defensive measures are adopted.

An estimate of the losses sustained is made:

"The committee's experiments have shown the wheat yield of weedy plots to be reduced by 10 to 44 per cent. Taking 15 per cent as the average, the estimate of the crop loss due to weeds in the prairie provinces is \$10,000,000 at current prices for wheat, oats and barley, to add over forty million dollars for an average of 10 per cent. This would be the high cost of the additional cultivation of the weeds within bounds, the cost of threshing, handling and shipping to Port Arthur and Fort William annually the equivalent of 96 train loads of 40 cars each of 240 tons, the direct cost of equipment, and many other kinds of losses due to weeds."

Dr. Robert Newton, director of the Division of Biology and Agriculture, National Research Laboratories, and the chairman of the committee, states in a foreword that cultural methods of control must be mainly depended upon, since the application of chemical herbicides is practicable only for small areas. Dr. Newton says:

"For most of the weeds fairly serious cultural methods have been developed, and we may expect great improvement along this line when we have available the results of the extensive studies of the growth habits of weeds now being conducted by members of the committee. Previous progress has been achieved largely by the method of trial and error; now it can be based on accurate knowledge of the effect of different methods on the development of various weeds. It would appear that general control may in future be achieved in proportion as educational campaigns are successful in inducing farmers to at large to co-operate in the application of the best methods. Community effort is essential, as with many weeds reinforcement from farm to farm takes place readily."

"Weed inspection systems might be improved by centralizing within each province the responsibility for both the appointment and supervision of inspectors, and by extending the legislation to require the cleaning of the seed. Municipal appointments are often poorly qualified and ineffective. The educational aspect of the work should be emphasized."

"This report goes out as the first publication of the Associate Committee on Weed Control. A second, dealing in a popular way with weed control in the light of the new information already available to the committee, is being published simultaneously. Other papers, based on the large volume of investigation work under way, will follow in due course. It is confidently expected that these will be recognized as important contributions to the solution of a problem of the first importance to agriculture."

G. P. McAllister, Professor of Agronomy, University of Manitoba; L. E. Kirk, Dominion Agronomist, Dominion Experimental Farms, Ottawa; George Godel, W. G. Smith and J. M. Manson, weed investigators of the Saskatchewan Department of Agriculture, the Alberta Department of Agriculture, and the Associate Committee on Weed Control respectively, are the joint authors of the report entitled, "Weeds and Their Control."

The origin of the Committee is described in these terms:

"No such body of knowledge exists about weeds as about animal and

plant diseases and insects, and until very recently no adequate investigations were under way to obtain such knowledge."

"In recent years the exploitation by commercial firms of various chemicals as herbicides has provided a renewed interest in this old, but never widely used, method of weed control. The National Research Council, in response to requests from numerous organizations, called a conference in Edmonton in the fall of 1929, on the destruction of weeds by means of chemicals. At this conference it became clear that the whole field of weed control was urgently in need of investigation. The Council then appointed an Associate Committee on Weed Control, with representatives of the chief institutions concerned in the general problem, and the committee undertook the task of developing a co-ordinated programme covering all aspects of weed control investigations. Having regard to the practicability of organizing the work, it was agreed that the initial activities should have more particular reference to the prairie provinces. Mr. J. M. Manson, of the University of Alberta, was engaged by the committee to make a reconnaissance survey of this area, and under his leadership the committee might have a better picture of the situation with which it was confronted. The results of the survey are set forth in this report."

A. Cousins, well-known English waler, who is pictured above in training for his forthcoming attempt to walk 200 miles in 48 hours.

## Model Coach Competition

## Model Coach Competition

Edmonton Youth Captures coveted Prize For Two Years In Success

Lawrence Drebert of Edmonton captured both the grand championship and the senior championship trophies in the annual competition of the Model Aircraft League of Canada which ended in Winnipeg recently.

It was the second year the youthful model builder came out on top of the list of competitors. The junior championship went to Joe Purvis, of Toronto.

Victor R. Hill of Vancouver, placed third in the senior scale model competition.

## A Floating Museum

Admiral Byrd's Whaler Houses Rex

Admiral Byrd's whaler, "The City of New York," on which he sailed to the Antarctic on his trip to the South Pole is berthed at the Regatta in the harbor across from the Hall of Science in the Century of Progress Exposition after a trip through the Great Lakes. The deck has been kept intact with the admiral's quarters untouched, but the rest of the boat has been made into a museum. Members of the expedition still on the ship act as guides showing visitors to the fair, the Adelle penguins, Emperor penguins and other exhibits gathered at the Pole.

## Quit Professional Careers

Noted Swimmers Reported As Intending To Give Up Quest For

The Toronto Daily Star says that Margaret Ravor, Philadelphia mermaid who won the \$3,000 first prize in the Canadian National Exhibition women's marathon swim, and George Young, noted Canadian marathon swimmer, will quit professional swimming after their marriage.

The Star quoted an unnamed "authority" in Johnny Walker's training camp as saying Young and his bride would settle down at a country place near Bracebridge, Ont.

## Ericsson Memorial

Unveiled In Iceland

American Minister To Denmark Officially At Ceremony

Frederick W. B. Coleman, American Minister to Denmark, unveiled at Reykjavik, Iceland, a statue of Leif Ericsson, the Icelandic hero, on his way to Greenland from Norway in the year 1000, discovered America. The statue was presented to Iceland by the American people in 1930. Ericsson is reputed to have landed Labrador, and possibly Newfoundland and Nova Scotia, in his voyage through the Arctic sea.

## Regimental Affiliations

Ontario Militia Units Form Fraternal Alliance With Antipodes

Reaching out beyond the traditional regimental affiliations between units of the Canadian militia and the British regular army, the Perth regiment, with headquarters at Stratford, Ont., have established a fraternal alliance with both Australia and New Zealand. The department of national defence announced royal approval of affiliation with the 20th Battalion, Australian military forces, and the 12th Regiment of New Zealand.

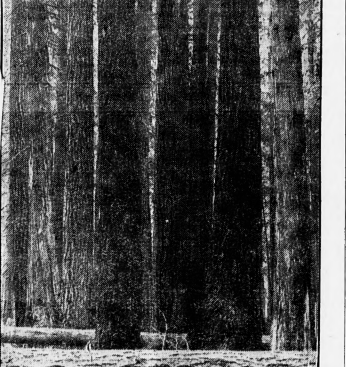

## Receive Gold Medal

President Von Hindenburg Marks the Goethe Centenary

J. L. Garvin, editor of the London Sunday Observer and a distinguished student of Goethe, is among 41 recipients of the gold medal bestowed by President von Hindenburg in connection with the celebration of the Goethe centenary at Frankfurt-am-Main.

Other recipients of the medal include the Italian statesman, Benito Mussolini, and Premier Eduard Herriot, of France.

## STAND OF DOUGLAS FIRS

Stand of Douglas fir on Vancouver Island, British Columbia. There are 175 billion feet of this timber growing on Vancouver Island.

When somebody said that trees were a thousand times in one man they did not exaggerate. It is for this reason that Frank D. Barnum is carrying on a Dominion-wide crusade for the conservation of our Canadian forests. The above picture shows a handful of Douglas firs. There are estimated to be 175 billion feet of this timber growing on Vancouver Island. Mr. Barnum has already bought a tract which is to be preserved for the public as his fight for the conservation of our timber.

Mr. Barnum says: "Trees protect and beautify our farms and gardens, protect our drinking water supplies, and give us power. They give us life; provide lumber and fuel, pulp and paper, and transportation, taxes and dividends, are our greatest promoter of health, beauty our city streets, protect our highways and check the ever growing menace of dust storms, and provide shelter from the scorching days of sun in summer and the icy blasts of winter, prevent cyclones, damaging floods, erosion and loss of fertility of the soil. They provide recreation and a tourist industry which, without cost to the country, ranks second in its importance, hence, including lumber and pulp, our four greatest industries are heavily dependent upon our forests, and in fact nothing that we use or eat or wear can be produced, manufactured or transported without the aid of wood."

"No other element of the universe has so many uses (4,500 in number), or of such vital importance as trees."

VARIOUS POINTS ABOUT THIS SMART DRESS HAVE BEEN THOUGHT OUT FOR MATRONS

For instance, the one-sided notting falling over the bodice broadens. Still more helpful perhaps is the unbroken line, created by the partial belt arrangement, which gives height to the figure. The inset panel at the centre-front, also does its bit toward slenderness.

Printed crepe silk is a lovely medium. The vestee is lace.

Style No. 438 is designed for sizes 36, 38, 40, 42, 44 and 46 inches bust.

Style 36 requires 4 1/2 yards of 36-inch lace, with 3/4 yard of 10-inch lace.

Certains may also be used in sheer batiste or lace novelty weaves. Sheer velvets are also suitable.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wisp copy carefully.

# Vancouver Now Claims To Be The Largest Grain Shipping Port In The Dominion

## One-Third-World's Sheep Within Empire

Nearly one-half of the world's raw wool and over two-thirds of the wool entering world trade are produced within the British Empire. Exports of home-grown wool from Canada have developed rapidly since the war, these exports now amounting to a yearly average of 7,000,000 pounds, about 40 per cent of the entire Canadian production.

The world's sheep population is estimated at nearly eight hundred million head, of which about one-third is in the British Empire. They produce between 3,500 to 4,000 million pounds of wool yearly, and of this amount about 1,500 million pounds, including much of the best wool, comes from the Commonwealth of Australia, South Africa and New Zealand. Outside the Empire the imports from producing areas are the South American countries, the United States and Russia. Of these territories only South America has a surplus for export.

## Belgian Memorial Stamps

Dedicated To Infantrymen Who Fell On West Front

Special postage stamps have been issued in Belgium, dedicated to the glory of the Belgian infantrymen who fought and fell on the West, at Nieuport, Dinant, and other sectors of the Western front.

The design common to both of the two denominations consists of a giant figure of an infantry soldier clad in great-coat, steel casque, and full equipment, striving amidst a glare of light through the ruins of a village.

A total of 40,000 pairs was printed, and the stamps were sold at a premium over face value in aid of the erection of a national monument in Brussels. Their values and colors are: 75 centimes (plus 35 cent; red) and 1 franc (plus 45 cent; blue).

They make a notable addition to the many series of stamps associated with the world war and its aftermath.

## Thousands Use 'Plane For Channel Crossing

Demand Is Greater Than Accommodation According To Report

During June 4,511 travellers were by Imperial Airways between London and Paris, as compared with 2,208 in the corresponding month of 1931.

The increase is notable and is reported that the demand is greater than the accommodation. When Louis Blériot, the French aviator, made his pioneer flight across the English Channel, from Calais to Dover, a distance of 21 miles, in 37 minutes, on July 25, 1909, he had visions of the future of flying, but he could hardly have imagined that the science would make such tremendous progress in less than a quarter of a century—Montreal Gazette.

## New Type Of Building

American Laboratory Constructed On Lines Of Thermos Bottle

A big laboratory recently built in America has been made on the lines of the thermos flask. Its walls are constructed to prevent heat from leaving either in or out. It is built entirely of concrete, with not a single window. Outside is a thick coating of cork with an outer layer of bricks. This acts as a heat insulator and maintains an unaltered temperature of 70 degrees. It would take a month in the depths of the severest winter for it to fall to 60 degrees. The purpose of the laboratory is to study the light given out by atoms at certain temperatures.

## Stained Glass Windows

For French Chapel

Carry Figures Of Saints Instead Of Biblical Subjects

Three stained glass windows, destined for the rebuilt Bellevue Chapel in France, which portray the historic ties that bind the allies and France, recently were exhibited in Boston.

The figures of an allied soldier, a French pilot, Lafayette and Washington, Pere Marquette and Champlain, occupy the places usually reserved for Biblical subjects.

Sir George Williams was the founder of the Young Men's Christian Association.

## The surprising growth of Vancouver's grain trade during the past year was summarized and clearly illustrated by R. C. Milroy, retiring president of the Grain Exchange division of the Vancouver Merchants' Association. The occasion was the annual meeting of the division.

For the fourth successive year Vancouver has exceeded Montreal in exports of Canadian wheat. Three years ago Vancouver exported 8,000,000 bushels, while Montreal shipped 34,000,000 bushels of Canadian wheat.

Last crop year, 1931-32, Vancouver exported more than 75,000,000 bushels of wheat and Montreal 54,500,000 bushels. Three years ago Vancouver's elevator accommodation was 1,500,000 bushels. Today, including additions now under construction, the port has the largest ocean grain elevator accommodation in the world, with 17,728,000 bushels. Montreal is second with 15,182,000 bushels.

In 1921-22 Vancouver exported 6 per cent of the Canadian wheat crop. In 1931-32 this port exported 44 per cent of the Canadian wheat crop. Montreal and other eastern Canadian ports 37 per cent, and United States ports 19 per cent.

Two years ago Vancouver's elevator capacity was 250,000 bushels; last year it was 7,000,000 bushels.

Three years ago this port's grain exports to Europe were 4,500,000 bushels; last year it totalled 71,000,000 bushels.

Last year's export from Vancouver was \$4,000,000 bushels of all grains, the second highest movement in history of the port. Records were made in connection with the export of grain to Europe, in movement of oats, in percentage of Canadian crop exported.

## Something New For Chicago World's Fair

Various Stages Of Manufacturing Taking Place Of Completed Exhibit

Chicago World's Fair in 1933 will be built on the theory that the "still exhibit" of previous expositions is in "modern" instead of completed products on display, the public will be shown the various stages of the manufacturing process. Because of this, policy there will be thousands of employees working on regular shifts in temporary factories during the six months period of the Fair. It is expected that 30,000 persons will be on the payrolls of the various concessionaires, exhibitors and educational displays.

## Fresh Water Leviathans

Larger Boats Make Faster Time On Lake Erie

In only a few years over the century Welland locks have grown from 150 feet long to 800 feet, because Canadian business requires to handle its boats that have grown from 100 feet to 820 feet. Moreover these freshwater leviathans that we have made to carry wheat and ore can no longer spare the time to dawdle away 25 hours between Erie and Ontario as they have had to do. Speed goes with size nowadays and our newest and biggest carriers with their 25,000 tons under hatches can pass from lake to lake and clamber up or down the cliffs in a third of the time—Montreal Star.

## Dog Accepts Challenge

Carries with three banknotes Miss Peggy Tyson of Winchmore Hill, England, went there playfully before her pet terrier. The dog accepted the challenge and chewed up the money. Miss Tyson was able to collect and match enough of the pieces to have the bills cashed at the local post office.

## Prices of agricultural products in Chile are increasing.

"Lend me five pounds."

"When I return from Paris."

"So you are going to Paris?"

"No"—Gutierrez, Madrid.

"No such body of knowledge exists about weeds as about animal and

plant diseases and insects, and until very recently no adequate investigations were under way to obtain such knowledge."

"In recent years the exploitation by commercial firms of various chemicals as herbicides has provided a renewed interest in this old, but never widely used, method of weed control. The National Research Council, in response to requests from numerous organizations, called a conference in Edmonton in the fall of 1929, on the destruction of weeds by means of chemicals. At this conference it became clear that the whole field of weed control was urgently in need of investigation. Printed crepe silk is a lovely medium. The vestee is lace.

Style No. 438 is designed for sizes 36, 38, 40, 42, 44 and 46 inches bust.

Style 36 requires 4 1/2 yards of 36-inch lace, with 3/4 yard of 10-inch lace.

Certains may also be used in sheer batiste or lace novelty weaves. Sheer velvets are also suitable.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wisp copy carefully.

When somebody said that trees were a thousand times in one man they did not exaggerate. It is for this reason that Frank D. Barnum is carrying on a Dominion-wide crusade for the conservation of our Canadian forests. The above picture shows a handful of Douglas firs. There are estimated to be 175 billion feet of this timber growing on Vancouver Island. Mr. Barnum has already bought a tract which is to be preserved for the public as his fight for the conservation of our timber.

Mr. Barnum says: "Trees protect and beautify our farms and gardens, protect our drinking water supplies, and give us power. They give us life; provide lumber and fuel, pulp and paper, and transportation, taxes and dividends, are our greatest promoter of health, beauty our city streets, protect our highways and check the ever growing menace of dust storms, and provide shelter from the scorching days of sun in summer and the icy blasts of winter, prevent cyclones, damaging floods, erosion and loss of fertility of the soil. They provide recreation and a tourist industry which, without cost to the country, ranks second in its importance, hence, including lumber and pulp, our four greatest industries are heavily dependent upon our forests, and in fact nothing that we use or eat or wear can be produced, manufactured or transported without the aid of wood."

"No other element of the universe has so many uses (4,500 in number), or of such vital importance as trees."

Three stained glass windows, destined for the rebuilt Bellevue Chapel in France, which portray the historic ties that bind the allies and France, recently were exhibited in Boston.

The figures of an allied soldier, a French pilot, Lafayette and Washington, Pere Marquette and Champlain, occupy the places usually reserved for Biblical subjects.

Sir George Williams was the founder of the Young Men's Christian Association.

"Lend me five pounds."

"When I return from Paris."

"So you are going to Paris?"

"No"—Gutierrez, Madrid.

## A Model Mining Camp

Only Well Equipped Men Get Into Echo Bay

While the rush to Conjuror's Bay gold strike continues, the men who are probably between 75 and 100 men on the ground now, Cameron Bay and the area immediately surrounding it does not lack excitement. Despite inroads made on the floating population of the main settlement by the gold fever, the number of permanent residents continues to soar and every day sees the community rooting itself deeper on the wooded foreland that three months ago was entirely untenanted.

Uniformed law and order has come in the shape of a Royal Canadian Mounted Police detachment, the officers arriving when the Speed 11 made her second trip across from Fort Franklin. Echo Bay unlike most mining camps, has failed to produce any "bad men" to date, this no doubt being due to the fact that it is accessible only to well-equipped men with definite business in mind. This is a real place in the life of the field for the police, however. Handling malefactors is only one item in the complex duties of the Royal Mounted.

Cameron Bay's first white woman landed July 27, in the person of Mrs. J. Gerhart. Wearing a coat of tan such as no bathing beach could produce and dressed in masculine attire, she ended a journey of 2,000 miles in which her husband and two other men from Herby, Alaska, had brought a couple of power-driven saws from the waters of the Peace to Echo Bay. With two months of river, lake and rapid behind her, she emerged in the conventional garb of civilization. So the all-male world known for many long months has collapsed. So far no protests have been heard.

J. J. Byrne, head of the Great Bear Lake mines, was a recent arrival by aeroplane and, donning the regulation drill clothes and high boots of the area, he has plunged into the activities of the field with the zest that marks every one from Conjuror to Hunter Bay. Mr. Byrne reported that when he was at Fort Resolution traffic was still headed toward the Mackenzie, the Bear and the lake. Obviously there is to be no peering out of the first surge of boats which has already descended on Great Bear, but the rush to the field will continue throughout the period of open water.

Many of the late arrivals and the majority of the early ones intend to remain over the winter and have brought well-stocked outfits to make this possible. In most cases, however, cabin building is being left until a later date. The main idea at the moment is to get to Conjuror Bay while there is still open ground.

### Find Free Gold

Important Discovery Reported In Great Bear Lake Mineral Field

"Free gold, the first ever found in the field, was picked up on the Oro Group, started in the spring of 1931, by Charles Sloan, veteran prospector, according to word received from Cameron Bay in the Great Bear Lake mineral field.

This group adjoins the Eldorado group and Lachine River, and work is proceeding feverishly to tap the discovery and ascertain its extent. The free gold is quite coarse and appears in particles about the size of wheat grains in the quartz.

### Named By Experts

Two experts, each with a costly outfit, fished for a while, morning without catching anything. They were about to pack up when a little girl threw out a line and pulled up a two-pounder—a trout.

"What kind of a fish is that, my child?" asked a passer-by. "Those gentlemen," she replied, "call it a 'dammit'."

There are only about 40,000 Eskimos in the entire Arctic region.

She: "All is over, I have nothing to say to you."  
He: Well, make it brief!—Buen Humor, Madrid.

W. N. U. 1938

UNIQUE SERVICE COMMEMORATES EIGHT HUNDRETH ANNIVERSARY OF ABBEY

A special service was held in the wonderful ruins of Fountains Abbey, Yorkshire, England, to commemorate the 800th anniversary of the laying of the foundation stones. Thousands flocked to the beautiful silver-grey ruins of the famous Cistercian Abbey, to take part in the robed nave, including the Duke and Duchess of York. The picture on the left shows the arrival of the popular Duke and Duchess, while the photo on the right gives a general view of the service inside the Abbey.

### Record Hard To Beat

New Jersey Man Has Been Sixty-Four Years

Addison H. Day, who will be 82 years old in November, has begun his sixty-fourth year as a regular commuter between Chatham, New Jersey and New York. When he stepped aboard the train the other morning at his home town to go to his desk in the office of the Marine Midland Trust Company, at 120 Broadway, where he is an official, he greeted on his thirty-ninth anniversary trip around the world, figuratively speaking. Officials of the Lackawanna railroad have estimated that in sixty-three years Mr. Day who has earned the title of champion commuter of the nation, has covered 956,000 miles on the railroad and from work, equivalent to thirty-eight times the circumference of the earth.

### Oddest Of Odd Jobs

Cornet Player Assists In Tuning Musical Auto Horn

The odd jobs of the automobile factories where automobiles and automotive parts are made are among the oddest of all human undertakings. For instance, there is the job of the cornet player in one of the plants making a very special and expensive motor car. When a finished horn comes from the production bench, the cornet player toots an arrangement of four notes. An assistant with a musical instrument then blows the horn. If they decide it is pitched correctly, it is sent on to the market place. If not, it goes back for further tuning.

### Strike At Price Cutting

Canadian Retail Druggists May Ask Aid Of Parliament

Canadian retail druggists may ask the Dominion Parliament to amend the Combines Act so as to permit retail distributors to fix reasonable prices upon trade marked goods. Dr. R. B. Stanbury, secretary of the Canadian Pharmaceutical Association, stated in Toronto.

His statement followed discussions at sessions of the Canadian Association and the Ontario Retail Druggists Association where delegates deliberated upon possible legal ways of fixing prices so as to strike at price cutting.

### Advertising Does Pay

A young actress one day lost a string of pearls, and she advertised the fact in a weekly journal. Afterwards, when asked if she had recovered the lost property, she answered excitedly, "Yes! And isn't advertising wonderful? The pearls I lost were only imitation, but those that have been returned to me are the real thing!"

### University Makes History

For the first time in the history of the University of Toronto, graduates have been given honorary degrees. This demonstrates that the members of this profession are developing an even greater pull and that due recognition is given of their services to University pupils after they have finished grinding their teeth over examination papers.

The line needs to be more sharply drawn between careful and reckless flying on the part of airplane pilots, is the conclusion of a university professor, who has made flight tests to study safety.

### The Oath Of Allegiance

Has Been Cause Of Trouble With Ireland Before

The fuss in Ireland over the oath of allegiance is not the first time the oath has caused trouble in Great Britain and Ireland. Both Sir David Salomons and Baron Lionel de Rothschild objected to the oath containing the phrase: "True faith of a Christian." In 1853 these words were deleted for all members of non-Christian religions.

Later, Charles Bradlaugh, athletic lecturer and writer, who was strongly republican in sentiment, objected to taking any oath at all. He had to be ejected from the House of Commons. Then it became optional with the members to take either an affirmation or an oath of allegiance. Occasionally some member balks at the oath and affirms his allegiance, instead. However, most of the members are sworn in by the old-time oath.

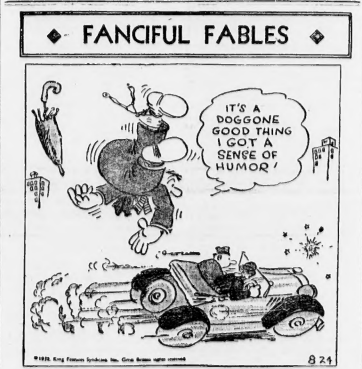

Ever since 1066, British history has been replete with such objections. There have been constant ripples on the waters of government. Each one plays its part in the progress of democracy. The good points of the objections are made part of the constitution, and the bad are just discarded.

### Chinese Woman Gets Degree From Japan

Former Shanghai Professor Is Now Doctor Of Science

The first Chinese woman to receive a doctor's degree from a Japanese university is Miss Tao Wetsun, former professor of chemistry in the Tattung University, Shanghai, who has been awarded a degree of doctor of science by the ministry of education. Her thesis was "A Scientific Study of the Digestibility of Rice Starch," and was accepted by the science department of the Imperial University, Kyoto. Miss Tao is 37, and attended school in Tokyo before entering Columbia University, New York, where she received her bachelor's degree in science.

Judge—"Do you know the meaning of an oath, madam?"  
Witness (proudly)—"Your honor, An' me husband shippe' before the mast these fifteen years!"

## Strange Manifestation

Germany Having Problem In Connection With Nudist Cult

Among its other perplexities the German Government has the nudists on its hands. The passion to go nude is spreading the world over. Nudism has been common, we are told by travelers, in parts of Russia for some considerable time. It has cropped out in unpleasant manifestations in Canada among the Doukhobors as a form of mass protest against real or imagined grievances. Sects of nudists, who are nudists, or within a wisp of it, have sprung up in England; but the most determined cult of skin-worshippers is apparently in Germany, and the German Government is trying to force its nudists back into their clothes by the imposition of fines.

We are so close to our own time that only by making a special effort can we realize what an eccentric age it is. Standards, and values, and principles, and beliefs which were the controls of human conduct for a century have, during the past dozen years, been scrapped and tossed overboard into the ocean of uncertainty on which we are sailing. It has always been a mark of uncertainty and doubt to find a relic of the past of Northern Europe to develop cases of nudism. To go naked is the most original thing a civilized person can do. The most arrogant challenge he can throw in the face of convention and society.

To what extent the epidemic of nakedness in Germany can be explained by this theory it might be hard to say; but it is an extraordinary indication of new abnormal are the conditions into which sections of the German people have fallen, and the effects the conditions have had on their behavior. The nudists are a curious sidelight on German trends under heavy political and social pressures—Mantolova Free Press.

## New Way To Raise Money

Switzerland Has Parade Of Ancient Vehicles To Aid Blind

Venerable motor cars from many countries were recently recalled from their well-earned rest and paraded before the citizens of Zurich, Switzerland, in a campaign to help the unemployed of that city.

In a programme organized by the Swiss Automobile Club and other groups interested in automotive transportation, a parade of 400 vehicles, ranging from luxurious limousines to street cleaning equipment, was a feature. Twenty-five of these were obsolete cars produced between 1890 and 1910.

Automobiles from five countries took part. The United States led with sixteen entries. Next came Germany with five, followed by Italy with four, France with three, and Austria with one entry.

## The Poultry Industry

Says Canada Can Compete Successfully In Empire Markets

Poultry men in Canada are having a difficult time, but they are not downhearted. L. C. Clifford, of Ottawa, the national conference of agricultural officials meeting at Toronto.

Suggestions that Canada could not compete with European countries in the poultry industry were not correct, declared Mr. Clifford, who is a former president of the World's Poultry Congress. He contended that while the European producer had some advantages in shipping costs, Canadian farmers are far ahead in high stock production, good sanitation, lower taxes and a lower cost of feed.

## Rail Safer Than Road

Figures For Accidents and Fatalities Show Big Spread

Comparing the accident figures for road and rail in Great Britain, C. T. Crump, at a national road conference, stated 235 persons were killed on the railways last year, 200 of whom were railwaymen, whereas 6,691 were killed on the roads. Every day 18 are killed in road accidents. There were 22,895 injured on railways, including every accident, however trivial, whereas on the roads the number reported was 202,113, in addition to thousands of accidents not reported.

## Country Ones Are

The inspector (examining a class of boys) picked on a ruddy-faced country lad.

"Now, boy," said the inspector, "do you know what vowels are?"  
"Yes, sir. I know what vowels are."  
"Well, what are vowels?"  
"Why, sir, vowels be chickens!"

George Washington was made an honorary citizen of France in 1793.

## A Priceless Possession

Famous Peacock Throne Of India Worth Thirty-Five Million Dollars

Valued at \$35,000,000 and made in the sixteenth century for the Great Moghul, the exquisite Peacock Throne, writes Penelope Bessell in the Illustrated Weekly of India, was taken from Delhi in 1739 to Tehena, by Nadir Shah, and when in Persia, last year I was lucky enough to be able to see this magnificent piece of workmanship.

As we arrived at the Palace gates, the sentries saluted and two soldiers approached to conduct us through the royal precincts. We crossed the first courtyard, where fountains played in a long marble basin, and went through an archway into the inner garden. Delicately arched bridges traversed the little artificial lakes and limpid streams, and tall poplars were reflected in the clear cool water.

Two more soldiers and a high official of the court met us at the entrance to the Palace itself, the walls of which were covered by colored tiles of various designs. To the right two twin square towers denoted the "Zenodora" or women's quarters.

We entered the Shah's residence by a triple doorway, supported by four pairs of marble columns, mounted a handsome staircase and were conducted through a succession of magnificently carpeted rooms till at last we reached the Treasury Room. In the presence of the Shah's officials and soldiers the seal of the lock was broken, and a moment later the door was thrown open. At the far end of the long gallery stood the priceless "Takht-e-Tauq" or Peacock Throne.

The throne itself is about six feet high at the back with arms and plat-forms for the feet, covered with a plating of pure gold, encased and encased with enamel and opaqued designs. The gold is encrusted with precious stones of every color, as varied as the hues in a peacock's tail, diamonds, emeralds, turquoises, rubies—some nearly an inch across. Over the feet, hanging from the corners of enormous emeralds hanging from each arm of the throne, these—owing to their immense value—have been removed and locked up separately.

Besides the throne there is a couch of similar workmanship, about eight feet by five, and standing some three feet from the ground. Each of its six legs is carved to represent a peacock's tail, and there is a pair of steps for the Shah to ascend. On this the Shah used to recline when holding his audiences, but now the Shah sits on a "Takht-e-Mansur," a white marble throne, beautiful too—though not to be compared with its counterpart. At the back of the couch is a scintillating circular star of large diamonds, about a foot across, which a mechanical contrivance behind it revolves on state occasions.

The Treasury Room is lined with mirrors which reflect each other over and over again. In cases along the walls recently by the Shah's order, daggers with carved and jeweled handles, gold cups and plate, mosaic pictures, a terrestrial globe in precious stones and treasures of every sort from every region of the world.

Once more the door is locked and sealed, the officials bow to each other, the soldiers salute, the keys are carried away; we decide by another staircase, and our visit to the Shah's dwelling is over.

Black—"What did his father advise when you told him you loved his daughter, but only had a hundred dollars?"

White—"He advised me to invest it all in a one-way railway ticket with no stopovers!"

## THREW AWAY HIS STICK

### When Scatation Yielded to Kruschen

There can be no doubt that this man has finished walking with a stick, for it is now four years since he discarded it.

He writes:—"For 18 months I suffered with chronic sciatica and rheumatism, and was unable to walk without the aid of a stick. But after taking Kruschen Salts for a short time, I was able to throw away the stick. It is now four years since this happened, and I have had no return of the complaint, and have not lost a day from work. I shall never be without Kruschen Salts, as they are worth their weight in gold. You can use this letter as you please, as I can honestly recommend Kruschen Salts to any sufferer."—C. F.

If the eliminating organs become sluggish, they permit harmful uric acid to accumulate and deposit itself in the tissues, muscles and joints in the form of needle-pointed crystals, which, piercing the nerves, cause excruciating pains of sciatica. The six salts in Kruschen stimulate the eliminating organs to healthy regular action. Mischievous uric acid is then given no chance to collect.

## WORLD HAPPENINGS BRIEFLY TOLD

Robert Moodie, 67, who had been for nearly 40 years connected with the circulation side of the "News of the World," being its senior representative in the South of England, is dead.

Dr. John Stanley, junior research investigator on the staff of the National Research Laboratories, formerly of Vancouver, B.C., has resigned. He has accepted the post of assistant professor of biology at Queen's University, Kingston.

A royal robe of sealskin, ornamented with ermine, to be worn on special occasions only, has been ordered by the emperor of Ethiopia from a firm of Montreal furriers. His majesty insisted the order be placed "within the empire."

The order of the Red Star, the highest decoration of the Soviet government, has been awarded to Col. Hugh L. Cooper, United States engineer, for his work on the huge Dneprostroy power development in southern Ukraine.

Having kept a census of horses since the World War, the British War Office will start one of automobiles.

Apartments built in Copenhagen, Denmark, last year, totalled 8,522, the largest number ever recorded in any 12 months.

No change is to be made in the size of Canadian one dollar bills, the finance department stated recently. Recent rumor said the Canadian bill would be cut down in size, much after the style of the smaller United States bills.

British Columbia's oldest pioneer, Alexander MacLean, died 74 years ago and whose memories went back to the days when the site of Vancouver was dense forest. He was born in San Francisco.

## Liner Card-Sharper Have Lost Occupation

Practice Is Almost Unknown Now On Atlantic Coast

In many of the world's big cities today, including London, England, are the scattered bands of clever and well-educated men who at one time were expert card-sharpers on the great luxury liners.

The depression, which brought about a scarcity of easy money, helped the police in their vigorous campaign against these men, who specialize in card-sharpping aboard ships. Their expenses were high, and the stakes at most of the games were too low to produce any profit after paying their fares as first-class passengers.

Card-sharpping on the Atlantic liners is today almost unknown.

Wonder somebody hasn't thought of using a motorcycle in a jazz band.

"Why do you sit and drink from morning till night?"  
"Well, you don't expect me to sit up at night to do it?"—Allie for Alia, Richmond.

## Seaplane Base At The Pas

On Air Route Maps

Erection of a mast and wind cone on the bank of the Saskatchewan River, as a guide to fliers, will be arranged by the Board of Trade of The Pas, Man., through the co-operation of the Imperial Oil Co.

The wind cone, which will mark the landing place, and a mooring platform for ponton equipped planes, will be arranged by the board.

H. L. Weber, agent at The Pas, for the Imperial Oil Co., offered the cone and assistance in its erection, and the board accepted the offer, passing a resolution of thanks to Mr. Weber's company.

The board will have The Pas, Man., registered on Canadian air maps as a fully equipped and qualified seaplane base.

## New Form Of Advertising

Interesting Process Used To Project Writing On Clouds

Sky writing, a new form of advertising in which the message is projected on the clouds at night, was demonstrated at London. The government recently decided the method was legal. The process involves the use of metal stencils placed in the beam of a powerful searchlight to cast letters on to the cloud base. The searchlight used is of 450,000 candle power. For skywriting purposes the limit of its really effective range appears to be a cloud base of about 3,000 feet high. Most of the legends above contained up to twenty letters. Some include a design such as the British lion.

Dr. John Stanley, junior research investigator on the staff of the National Research Laboratories, formerly of Vancouver, B.C., has resigned. He has accepted the post of assistant professor of biology at Queen's University, Kingston.

A royal robe of sealskin, ornamented with ermine, to be worn on special occasions only, has been ordered by the emperor of Ethiopia from a firm of Montreal furriers. His majesty insisted the order be placed "within the empire."

## Increase Shown In

### Canada-Empire Trade

Statistical Review Issued By Department Of Trade and Commerce

Canada is becoming more empire conscious in her purchases. A statistical review, issued by the Department of Trade and Commerce, showed that nearly 30 per cent. of the Dominion's imports in July came from empire countries as compared with only 26.3 in the corresponding month last year.

The percentage of foreign imports dropped from 73.7 per cent. in July to approximately 70 per cent.

Compared with the preceding July, Canadian imports last month from foreign countries registered a drop of \$10,621,346, while those from empire countries decreased by only \$2,000,000.

In July Canada wrested from the Netherlands second place among countries of the world in supplying the cheese market of the United Kingdom. British trade figures, Dominion Bureau of Statistics reports, show that the leading imports: Canada, 12,288,238 pounds; and Netherlands, 11,684,656 pounds. There was a sharp advance in the importation of Canadian cheese in July. British trade figures give the amount as \$1,726,028 pounds as compared with \$48,872 pounds a year ago. The United States supply last month was \$465,384.

Why Outlined Profiles Are Called Silhouettes

Named After French Finance Minister Noted For Strict Economy

The black profiles called silhouettes are named after Etienne de Silhouette, the Finance Minister of France in 1789. Silhouette made an immediate name for himself by the stringent economies he effected in public finance. It was his policy to refuse to pay for more than "the shadow of any substance." The process of outlining profiles through by shadow on to a white sheet had just been introduced at that time, and as these pictures resembled exactly to resemble the Minister's avowed policy, his name was immediately bestowed upon them.

## Liquor In Bulk

Saskatchewan Commission Planning To Follow Lead Of Other Provinces

The Saskatchewan Liquor Commission is planning to follow the lead of other provinces and import certain bottles of liquor in bulk instead of in bottles.

By importing hogheads of liquor and bottling it here, a saving is effected on overhead items such as the cost of bottling and excise duties. The bulk purchase scheme, it is expected, will mean lower prices to the purchaser.

Iceland has 1,605 automobiles.

## BRITISH PARLIAMENTARIANS

Address On Trip Through Western Canada

By the achievement of the Imperial Conference we have shown how great group of nations can organize for trade purposes along right lines, is the opinion of the Right Honorable Sir Philip Cunliffe-Lister, C.B.E., M.C., M.P., Secretary of State for the Colonies, expressed during a brief stop in Winnipeg on a tour of the Canadian Pacific Railway lines to the west coast.

Sir Philip was accompanied by a group of keen young British parliamentarians eager to see western Canada in the harvest season. Among the agricultural constituents in England, J. P. L. Thomas, M.P., private secretary to the Secretary of State for Dominion Affairs; Geoffrey Lloyd, M.P., private secretary to the Lord President of the Council; and Viscount Hinchinbrooke, private secretary to the Right Honorable Stanley Baldwin.

"In England," said the distinguished visitor, "we have taken the tariff out of politics and put it into business, making it an entirely business proposition. The tariff has to be adjusted to what the producers need and no. Recognition of that fact marks all the agreements that were reached at the conference. Everything was approached from the point of view of getting the equilibrium between supply and demand, so that all would get the fairest prices."

Sir Philip felt that British manufacturers would devote more attention to the situation and the market possibilities were already being studied. He was very confident of the ultimate results.

The Secretary of State for the Colonies and his party spent a week-end in Banff as guests at Banff Springs Hotel and on a trip to the mountains through which they motored. Proceeding to the Pacific Coast Sir Philip addressed several meetings under Canadian Club auspices and also spoke at Winnipeg in his retirement. A board of trade luncheon at the Royal Alexandra Hotel.

Hon. Sir Philip Cunliffe-Lister, and his private secretary, Captain T. L. Dugdale, M.P.

## Secure Animal Pictures

American Nature Association Party Meet With Success In Rockies

After four weeks on the trail along the northern boundary of Jasper National Park and the adjacent mountains of British Columbia, the American Nature Association party returned to Jasper Park Lodge with several thousand feet of big game motion picture films.

Under the leadership of Arthur N. Pack, Princeton, N.J., president of the association, the party included Laurence B. Rockefeller, Tarrytown, N.Y., son of John D. Rockefeller, Jr.; Mrs. Pack, Mr. and Mrs. Robert W. Bryan, Jr., all of Princeton.

Some novel staking was a number of fine shots for the camera crew. Wearing white costumes with hoods, Mr. and Mrs. Pack aroused sufficient interest among the ordinarily-suspicious goats to approach within a few feet of them on one occasion. In the Snake Valley the party discovered a herd of more than 100 caribou and acquired some fine close-ups. Later, in the Snake Indian River country, they ran across practically every kind of game in the Canadian Rockies.

"I got one fine Billy," said Mr. Pack, "by dropping on my knees and imitating him when he lowered his head and stamped his foot to show anger. We exchanged boasts and compliments until I had crawled to within ten feet of him. Then he took to his heels and it all made a fine picture."

A Worth-While Idea Here's a little idea worth keeping tucked back somewhere in your mind. Remember that it is always a good plan to remove the spare from the rack in the rear or out of the fender well before jacking up the car to take off the flat. Otherwise, in getting the spare loose the car may be shaken enough to cause it to slip off the jack.

Iceland has 1,605 automobiles.

## Recipes For This Week

(By Betty Barclay)

### BANANA BETTY

2 cups rice flakes crushed.  
1/2 cup butter, melted.  
2 apples.  
2 bananas.  
1/2 cup sugar.  
1/2 teaspoon cinnamon.  
1/4 cup water.  
2 tablespoons lemon juice.

Four melted butter over rice flakes crumbs mix thoroughly. Place a layer of one-third the prepared crumbs in bottom of buttered baking dish. Cover with 1 apple and 1 banana, pared, and thinly sliced. Sprinkle with the sugar, cinnamon, and lemon juice. Cover with another layer of crumbs and repeat, using remaining fruit and seasonings. Pour water over mixture. Bake in moderately hot oven (375 degrees Fahrenheit) 30 minutes. Serves 6.

### COCONUT SALAD DELICIOUS

2 cups cabbage, finely shredded.  
1 cup grated pineapple, drained.  
1 cup coconut, premium shreds.  
1/2 cup mayonnaise.  
Dash of salt.

Crisp cabbage by allowing it to stand in ice water. Drain and dry thoroughly. Toss lightly together with remaining ingredients. Serve on crisp lettuce. Garnish with strips of pineapple and chopped chives. Serves 6.

### Vases Placed In Archives

Texas University Has Ornament Belonging To Helen Of Troy

Two vases circumstantially accredited with being from the boudoir of Helen of Troy have been placed in the archives of the University of Texas, at Austin. They are the gift of the late A. W. Terrell. Minister Terrell received them from Consul Agent Frank Calvert, who owns the site of the ancient city of Troy. Calvert cooperated with Dr. Heinrich Schliemann in excavations of the ancient city.

"Is that your college diploma you have framed there?"  
"Well, it's a sort of diploma. It's a worthless stock certificate showing that I've been through the school of experience."

British trade figures, Dominion Bureau of Statistics reports, show that the leading imports: Canada, 12,288,238 pounds; and Netherlands, 11,684,656 pounds. There was a sharp advance in the importation of Canadian cheese in July. British trade figures give the amount as \$1,726,028 pounds as compared with \$48,872 pounds a year ago. The United States supply last month was \$465,384.

## Your Pipe Deserves The Best!

... particularly when the best costs you no more than ordinary tobacco. Smokers realize how much more fragrant, how cool, how satisfying a pipe can be when it's loaded with Ogden's cut plug.

## Indications More Favorable

Better Tone Said To Prevail Business Circles

Although no definite improvement has yet appeared in the volume of Canadian trade, a better tone pervades business circles and greater activity is in sight, according to a business summary of the Bank of Montreal.

Full average crops are assured, says the report. Wheat crops in the prairie provinces will run 100,000,000 bushels more than last year and low harvesting costs will be helpful to farmers and all branches of business. Except for hay, crops in other provinces are excellent. Livestock prices are low but marketings are large and the dairy industry maintains a normal output with recent advances in the price of cheese and butter.

Most manufacturers continue slight but shipping is better than last season; more grain has passed through Montreal; more British coal is being imported and a stronger autumn business is expected.

The report points to the general hardening of commodity prices as an encouraging sign. Export trade for July was higher than in any month since December. Imports were down, increasing Canada's favorable trade balance.

More confident feeling with a rise in commodity prices is reported for both the United Kingdom and the United States.

## British Speed Up

Telephone System

Invention Called "Ghost Circuits" Perfected By Post Office

In an effort to speed up the British telephone system, the post-office has perfected an invention which is expected to prove revolutionary. A new system of "ghost" telephone circuits using one pair of telephone lines has been introduced.

It established a new British record when first inaugurated to tell the world of King David's record of 100 run in the British speed boat, "Miss England III," on Loch Lomond.

"The new development is based on the carrier wave system of voice transmission," said an official of the G.P.O.

"It is really after the principle of wireless applied to the telephone. The engineers, who have been testing at the research station in London, have established that in theory one circuit of two wires can be used for any number of circuits."

## Church Service Held

On Nelson's Flagship

Was Notable Event Of Navy Week At Portsmouth

Naval officers and blue-jackets stood bareheaded with citizens of Portsmouth, on the decks of the Victory, for the first public church service that has ever been held to usher in Navy Week.

More than a thousand people gathered on the stone pinnacles below surrounding the famous old warship to join in the service. This was relayed by loud speakers.

The hymns were, "O God our help in ages past," and "For those who perish in the sea."

The Bishop of Portsmouth based his sermon on the life of the navy's greatest admiral, Nelson.

A small group of people afterwards filed Nelson's day cabin, two decks below, surrounded by his own furniture, to receive communion from the admiral's own communion plate.

## A Record For Speed

Parcel From Montreal Reached Baghdad In Thirteen Days

From Montreal to Baghdad in 13 days—this is the record established in sending a 10-pound sample consignment of Canadian industrial products to Baghdad.

Of the 13-day period, seven days were taken for an ordinary steamship crossing from Montreal to Liverpool. From the Mersey-side the package was expressed to London, then by automobile to Croydon airport where it was just in time to catch the London-Indian mail plane. On the 13th days of its journey the consignment reached its destination, ready to capture a new market in the Near East.

Why argue? If you are right, you learn nothing. And being wrong makes you so mad you don't want to learn.

"The neighbor's piano is too loud. Shut the door."  
"It is shut."  
"Then turn the key."—Pages Gates, Yverdon.

## THE HOUSE OF DREAMS-COME-TRUE

— BY —  
MARGARET PEDLER  
"The Splendid Year" "The Herald"  
Hodder & Stoughton, Ltd., London.

### CHAPTER XXX—Continued

She made no pretence at mourning the man who had turned her life into a living hell for nearly three years and who had stood like gaoler behind her and the happiness which might have been hers had she been free. But the conventions, as well as her own feelings, dictated that a decent interval must elapse before she and Nick could be married, and this would be for a quiet period dedicated to the readjustment of her whole attitude towards life.

The length of that period was the subject of considerable discussion. Nick protested that six months was amply long enough to wait—too long, indeed—but Claire herself seemed disposed to prolong her widowhood into a year.

"It isn't in the least because I feel I owe it to Adrian," she said in answer to Nick's protest. "I don't consider that I owe him anything at all. But I feel so battered, Nick, so utterly tired and weary after the perpetual struggle of the last three years that I don't want to plunge suddenly into the new duties of a new life—not even into new happiness. It's difficult to make you understand, but I feel just like a sponge which has soaked up all it can and simply can't absorb any more of anything. You must let me have time for the past to evaporate a bit."

But it required the addition of a few commonplace observations on the part of Lady Anne to drive the nail home.

"Claire is quite right, Nick," she told him. "She is temporarily worn out—mentally, physically and spiritually spent. Her nerves have been kept at their utmost stretch off and on for years, and now that release has come they've collapsed like a fiddle-string under the peg that holds it taut is loosened. You must give her time to recover, to key herself up to normal pitch again. She isn't fit to face even the demands that big business brings in its train."

So Nick had perforce to leave to Claire's decision and it was settled that the first month or two, at least of her widowhood Jean should remove herself and her belongings from Staple and bear her company at Littlehamwood. And meanwhile Nick and Claire would spend many peaceful hours of quiet happiness and companionship while Claire, as she herself expressed it, "rebuild her soul."

To Jean the issue of events had brought her nothing but pure joy. Her belief had been justified, and the gateway of death had become for these two friends of hers the gateway of happiness.

She had neither seen nor heard any-

thing of Burke since the day she had fled from him on the Moor, although indirectly she had discovered that he had quitted the bungalow the day following that of her flight from it and had gone to London.

Judith sent her a brief, rather formal letter of congratulation upon her engagement, but in it she made no reference to him nor did she endeavor to explain away or palliate her own share in his scheme to force Jean's hand. Probably no odd kind of loyalty to her brother prevented her from clearing herself on his expense, added to a certain dogged pride which refused to let her estimate any action of hers to the daughter of Clym Peterson.

But none of these things had any power to hurt Jean. In her new-born happiness she felt that she could find it in her heart to forgive anyone anything! She was even conscious of a certain tentative understanding and indulgence for Burke himself. He had only used the "primitivist" methods his temperament dictated in his effort to win the woman he wanted for his wife. And he had failed. Just now, Jean could not help sympathizing with anybody who had failed to find the happiness that love bestows.

She reflected that the old Gypsy on the Moor had been wonderfully correct in her prophecy concerning Nick and Claire. The sun was "shining but" for them at last, just as she had assured them that it would. And, with the same, came a sudden clutch of fate at Jean's heart, like the touch of a strange hand. The gypsy had had other words for her—harder, less sweet-sounding.

"For there's darkness coming!"

black darkness."

The shiver of a little. She felt as though a breath of cold air had passed over her, chilling the warm blood that ran so joyously in her veins.

### CHAPTER XXXI

#### An Unwelcome Visitor

Blaise was seated at his study table regarding somewhat dubiously a letter which lay open in front of him. It was written in a flowing, foreign hand and expressed with a quality stilted, un-English turn of phrase. The heading of the notepaper upon which it was inscribed was that of a hotel in Exeter.

"Dear Mr. Fotherm," it ran. "You will remember, I am sure, to have received a letter from me, since we have met only once. But I have something of the most importance to confide in you, and I therefore beg that you will accord me an interview. When I add to this that the matter approaches very closely the future of your daughter, Miss Peterson, I do not doubt to myself that you will appoint a time when I may call to see you."

The letter was signed M. de Varigny.

Blaise had received this thought-provoking epistle two days previously, and had been impressed by an uncomfortable consciousness that it fore-

boded something unpleasant. He could not imagine in what manner the affairs of Madame de Varigny impinged upon his own, or rather, as she seemed to imply, upon those of his future wife, and this very uncertainty had impelled him to fix the interview the Countess had demanded at as early a moment as possible. Disagreeable were best met and faced without delay, so now he was momentarily awaiting her arrival, still unable to rid himself of the impression that something of an unpleasant nature impended.

He glanced through the open window facing him. Afterwards, he was always able to recall every little detail of the picture upon which his eyes rested; it was etched upon his mind as ineffaceably as though cut upon steel with a graver's tool.

Although the mellow sunlight of September flooded the lawns and terraces, that indescribable change which heralds autumn had already begun to manifest itself. Not that any hint of chill as yet edged the balmy atmosphere or tint of russet reddened the gently waving foliage of the trees. It was something less definite—a suggestion of maturity, of completed ripening, conveyed by the deep, rich green of the grass, the strong, woody growth of the trees, the full-blown glory of the roses nodding on their stems.

To the left, in the shade of a stately cedar, Lady Anne and Jean were engaged with their sewing and wrying materials at hand, and the rays of sunshine, filtering between the widespread branches above them, were fugitive gold and silver lights in the dormant autumn and white-crowned hedges. Further away, in the valley below, the brown sandbag of a wide-bottomed boat broke the smooth expanse of the lake whence the mingled laughter of Nick and Claire came floating up on the breeze.

It was a peaceful scene, full of intimate happiness and tender promise, and Blaise watched it with contented eyes. The voice of Blaise, formal and urbane, roused him from a pleasant reverie.

"Madame de Varigny," announced that functionary, throwing open the door and standing aside for the visitor or her, entering.

Blaise rose courteously to greet him, holding out his hand. But the Countess shook her head.

"No, I will not shake hands," she said abruptly. "When you know who I am come, you will not want to shake hands with me."

There was something not unattractive about the Countess' refusal to sail under false colours, more especially softened as it was, by the calm of the faintly foreign accent and intonation.

Madame de Varigny had paused a moment in the middle of the room and was regarding him with a curiously appraising eye, and as Blaise returned her gaze he was conscious, as once before at the fancy-dress ball at Montevideo, of the strange sense of familiarity this woman had for him.

"I am sorry for that," he said, answering her refusal to shake hands.

"Won't you, at least, sit down?" pulling forward a chair.

"Yes, I will sit."

She sank into the chair with the quick, fluid motion of the South, and continued to regard Blaise watchfully between the thick fringes of her lashes. Had Jean been present, she would have been struck anew by the expression of implacability which hardened the dark brown eyes. By that, and by something else as well—a look of unmistakable triumph.

"I have much—much to say to you, Monsieur Tur-na-rin," she began at last. "I will commence by telling you a little about myself. I am—here she looked away for an instant, then shot a swift, penetrating glance at him—

(To Be Continued.)

### Science Perfects Cure

#### For Car Drowsiness

Ancient Chinese Drug Is Said To Be Effective

Science has perfected a cure for the driver who falls asleep at the wheel of his automobile. Narcolepsy, the name given to sudden spells of irresistible sleepiness, has been found to succumb to doses of ephedrine, a drug which in the form of a salubrious was used in Chinese medicine 4,000 years ago. Dr. Harry A. Collins, who announced the cure, has announced the case had responded instantaneously after recurring attacks for 12 years had caused him to have several automobile accidents.

Pelicans have no song and the adults no call-notes, while the young call for food with a low grunt, rising at times to a shrill scream.

Most woodpeckers bore round holes in trees, but the pileated woodpeckers dig both round and square holes.

## It does pay to "ROLL YOUR OWN"

From the standpoint of economy—each 10c. package of Turret Fine Cut contains the makings for at least 50 cigarettes—and Chanticleer cigarette papers free.

From the standpoint of real smoking pleasure, there's nothing like rolling your own with the smooth, mellow, fragrant Virginia tobacco that you get in the Turret Fine Cut package.

It does pay to roll your own with Turret Fine Cut.

15¢ and 30¢ packages  
size in 1/2 lb.  
vacuum tins

FREE Chanticleer cigarette papers with every package.

### Believe It Or Not

Resident of Halifax Comes Along With Good Fish Story  
The best fish story of this season is told by a resident of historic old Halifax. The story is about a gold fish, not the one who had no privacy, but an extremely adventurous gold fish.

The gold fish, according to a reputable Halifax Journal, jumped four feet from its bowl to a chestboard, where it lay in a state of coma for good some time.

It was not long before the gold fish, known how long. Discovered by its heart-beaten owner before rigor mortis had set in, it was placed in cold water. No result. But upon being held over the stove it was reminded of its old home among the rice fields of Japan and gave several encouraged twiggies. Back again in its natural element it resumed its evasive and wandering, if restricted, manoeuvres. Believe it or not, and wonder what a gold fish thinks about.

Reclamation Project  
Reclamation of 10,000 acres of rich silt lands on the Kootenay River delta at an expenditure of \$300,000 will be started this fall, it was announced by Hon. N. B. Loughheed, British Columbia Minister of Lands. The project will be completed within two years.

Building construction in Shanghai, China, is increasing.

Playing the game is the thing, not the score.

## DECLARE THEY HATE SIGHT OF DUST CLOTHS

Canadian women vote dust cloths a nuisance to use and to wash

MUCH PREFER APPLEFORD WONDER PAPER

With so much inventive thought being given to eliminating unnecessary housework, it is only natural that a wonderful substitute for the dusty dust cloth should be sought.

It has been found! Appleford Wonder Paper, which actually dusters—sifts dust—so it is possible to wear a heavy dust cloth and all they stand for. Wonder Paper is made from clean rags and soft paper pulp, thoroughly impregnated with a high-grade furniture polish, and absorbs dirt instead of spreading it. Appleford Wonder Paper comes in handy packages, twenty-five sheets each, as large as a dust cloth. You merely crumple a sheet into a soft wad, and go over the surfaces requiring attention.

You'll be amazed at the quick and lasting finish Wonder Paper gives. When one side is worn and soiled, simply turn the Wonder Paper over and use the other side. The furniture or woodwork was gone through with a soft wad of Wonder Paper on the floor.

And when you're through—throw it away. No dust to shake out or wash. No bother at all. The most obstinate part of housework is half the time away with half the effort. Doesn't the idea appeal to you?

### Special Offer

Wonder Paper is made by the makers of the famous PARSANI heavy waxy paper in the GREEN BAR. Most grocery stores and department stores sell Appleford Wonder Paper. If yours doesn't, write to the manufacturer and we'll give you a new and unique booklet entitled "Let's Duster" containing one hundred recipes, as a bonus for your trouble.

Appleford Paper Products, Ltd., Hamilton, Ontario.  
Enclosed find 25¢ for which please send me one full-size package of WONDER PAPER and one hundred recipes for "Let's Duster."

## All Her Children Were Troubled With Diarrhoea

Mr. J. J. Bickert, R.R. 1, Enderby, B.C., writes—"Last Summer all my children were troubled with diarrhoea, and were so bad I did not know what to do. A friend told me to give them Dr. Foster's Extract of Wild Strawberry. So I got a bottle, and after a couple of doses you should have seen the change. The children were soon well again, and I am very thankful to your remedy. I find it is the only one that relieves so easily and quickly."

## Health Service

OF THE  
Canadian Medical Association

Edited by

GRANT FLEMING, M.D., ASSOCIATE SECRETARY

## Drink Water

Most people, without much effort, can secure all the water they require for drinking. Nevertheless many persons suffer from a lack of the full measure of the health they could enjoy because they fail to use plenty of water.

We cannot have good health if we deprive our bodies of the water which they need. Water is an essential part of every tissue of the body. The blood is mostly water, and even such hard tissues as the teeth and the bones contain water.

Without sufficient water the body functions become disturbed. There may be headaches, the digestive system may be upset, or other symptoms of faulty functioning may appear. We can live for many days without food; life can continue for only a few days without water.

The regular daily use of plenty of water is necessary to replace the water which our bodies lose each day we live. Water is lost in every breath. Breathe on a cold glass and you will see collected on the glass, the droplets of water which are contained in the breath.

The skin gets rid of a large amount of water in the form of perspiration. This is obvious in summer. It goes on in a lesser degree, in cold weather when--because it is not noticeable--it is called "insensible" perspiration.

Quantities of water are passed down the kidneys and in the movements of the bowels.

and any persons owing arrears have the privilege of paying current taxes and taking the discount after payment of one year's taxes of the arrears has been paid.

All told, we lose on an average about five pints of water daily through the various channels mentioned. We must take into our bodies an amount of water at least equal to what we lose if we are to keep our bodies healthy.

Many people used to go to some mineral springs when they felt "below par." The benefits received from their stay at the springs were due in large measure to the increased quantities of water they drank.

Much of the water we require is taken into our bodies in our foods, many of which contain a large percentage of water. Green vegetables and fruits contain much water; about 67 p.c. of milk is water.

Moderate amounts of fluids with meals is desirable, provided they are not used to take

the place of thorough chewing of the food. The time to drink at meals is when the mouth is empty and never to wash down food.

A glass or two of water upon

rising in the morning, and between meals, together with the moderate use of fluids at meals, will assure the regular, daily use of plenty of water which is essential to good health.
